

Sodium Percarbonate

Sodium percarbonate is an environmentally safe bleaching agent. It is used as bleaching and oxidizing component in laundry and dishwashing detergents, also used as main ingredient for bleach-boosters.

- Bleaching agent for many industries, like textile and paper industry
- Stain removal agent for laundry detergents
- Cleaner for dishwashing detergents
- Oxidizing disinfectant for a variety of industrial applications.

Sodium percarbonate removes effectively stains from your laundry without damaging fabric and its colour.

Chemical name Sodium Carbonate Peroxihydrate
CAS 15630-89-4

Specifications:

Items	Value
Active Oxygen Content	≥ 13%
Bulk density	900 g/l - 1200 g/l
Moisture	≤ 1.0%
Particle size	
>1600 µm	≤ 2.0%
<150 µm	≤ 3.0%
Mean particle size (MPS)	400-900 µm

Physical and chemical properties:

Characteristic	Value
Appearance, color	White free-flowing granules
Odor	Odorless
pH, 1%	10 - 11
Wet Stability (48 hrs @ 32°C, 80% RH)	≥ 58%

Packaging:

Bags	25 kg
Big-bags	1100 kg
Bulk	25.000 kg
